## Earth's Tectonic Plates Experiment

In this experiment the sheets of paper represent tectonic plates.

What you need

- · A large flat box
- Scissors
- · Two pieces of paper
- · Cardboard
- · Tape.

## What to do

- 1. With adult help, cut a narrow slit in the top of the box.
- 2. Cut a larger square in the side of the box.
- 3. Slide two pieces of paper through the slit and about halfway into the box.
- 4. Tape a cardboard block on the outside edge of one piece of paper to represent a continent.

Demonstrate the movement of the tectonic plates

- 1. Push the paper up from inside the box. The sheets will move away from each other.
- 2. Pull the paper down from inside the box. The continent will also move!
