

Sight Word Bingo

- Photocopy enough of the grids below for the number of children in your class.
- Laminate them, and use a whiteboard marker to write down in the boxes the sight words you are currently studying in class (ensuring that each card is slightly different).
- As you call out each sight word, children cover up the word with a counter, if it appears on their card. The first child to cover their card completely calls out 'bingo', and wins the game!
