

COMMUNITY - PATCHWORK

Stick together some images from your neighbourhood, to create a 'patchwork of people' from the community.

- Make a list of the shops and services in your local community.
- Provide each child with a copy of the attached worksheet.
- In the first square, allow children to draw a portrait of their own family.
- In the second square, ask children to select one service provided in the local community, such as police, fire brigade, shops, post office, or take away food. Instruct children to draw something which signifies that particular service. For example, a hospital they could draw a doctor, or a building with a cross on it.
- Cut all the squares out, and use masking tape to join them all together on the back. This makes a beautiful quilt, which can be easily moved to various positions around the classroom. For a very professional result, stick coloured paper strips between the squares, to create the illusion of a real quilt!
